Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English. Brand new Book. This Step-By-Step Workbook will employ the Visual Basic Application (VBA) programming language that is built into Excel. It will help to automate repeating operations and redundant tasks. Readers will begin by recording macros and storing the results in Visual Basic code. Minor changes can then be made using the Visual Basic Editor to troubleshoot problems. Techniques will be discussed to demonstrate how to select cells in order to format areas in an automated way. Variables will also be covered. These are great methods to help remember specific items for use at a later time. "If" logic will be discussed to help automate decisions and provide the logic necessary to make adjustments. Message and Input Boxes are ways to provide input and store results in a cell. Loops will provide the logic to repeat steps in multiple cells. Worksheet and Workbook manipulation can allow accessed data from multiple worksheets. The use of all these functions will automate the overall efficiency of using Excel. Furthermore, once you learn the Excel VBA program language, you'll be able to apply your VBA programming knowledge to other MS Office products, including Microsoft Access. What's in the workbook?
